Premier University, Chittagong.
B.Sc. in CSE (2023)

Skils

Backend
- Laravel
- PHP
- MySQL

Devops
- VPS (Linux)
- AWS
- cPanel

Frontend
- React
- jQuery
- JavaScript
- Tailwind
- Bootstrap
- CSS3
- HTML5
- Flutter

Knowledge

- DSA
- Docker
- Git and GitHub
- Linux OS

Work Experience

Coders Lab / Software Engineer
October 2023 - Present

Projects

- **HKD International (CEPZ), Ltd / Laravel, MySQL**
  ERP Implementation Project
  Managed databases, developed APIs, conducted testing, and optimized performance for the ERP project. Key responsibilities included database architecture, API design, testing, and performance enhancements. Played a vital role in ensuring system reliability, scalability, and efficiency.

- **House Management System / Laravel, MySQL, React**
  Property Management Software
  Led the development of this system using React.js, Laravel, and MySQL. Gathered requirements, designed system architecture, and implemented both frontend and backend functionalities. Built RESTful APIs for seamless communication between frontend and backend components and ensured data security.

- **Grassophy / Laravel, MySQL, React**
  Species Management Software
  Contributed to Grassophy, by developing API for mobile application. Built RESTful APIs using Laravel and MySQL for seamless communication with the mobile application. Additionally, created the frontend interface for administrative tasks, facilitating efficient management of application data using React.js.

- **helpNhelper / Laravel, MySQL**
  Fundraising Software
  Developed HelpNhelper, a Fundraising Software, using Laravel and MySQL for backend, and Laravel Blade for the frontend interface.Took charge of the end-to-end development process, ensuring robust backend architecture for efficient data management, secure handling of donations and financial transactions.

- **Many more . . .**
